Sir:

**PRE-APPEAL BRIEF REQUEST FOR REVIEW**

The current remarks provide the succinct and focused set of arguments for which the review is being requested and accompany the concurrently filed Notice of Appeal. Applicant requires a one month extension of time to file the current Notice of Appeal and requests that this be considered a petition therefor. Applicant has enclosed a Credit Card Form authorizing payment of \$620.00 to cover the cost of the Notice of Appeal and the one month extension of time. If any additional fees are required in association with this response, the Director is hereby authorized to charge them to Deposit Account 50-1732, and consider this a petition therefor.

### REMARKS

Applicant files the Request for a Pre-Appeal Brief Review of the application so that the panel of Examiners may determine whether the Office Actions of record adequately establish anticipation and obviousness for the claims.

#### **A. The Patent Office Has Not Established Anticipation**

Claim 1 requires "moving processing of said given channel to a different one of said plurality of processors. . . ." The Patent Office, in the Advisory Action agrees that Hsu does not teach a single call being handled by multiple processors without an intervening call set up request, but asserts that the claim language does not reach this far. Applicant disagrees, as explained in the Response filed September 8, 2005, page 3, lines 11-16, the claim language and the specification contradict the Patent Office's position. To this extent, Hsu does not anticipate claim 1 or the claims which depend from claim 1.

As further argued in the Response filed September 8, 2005, page 3, line 27-page 4, line 4, claims 9 and 10 are likewise not anticipated.

#### **B. The Patent Office Has Not Supported the Motivation to Combine the References**

As Applicant argued in the Response filed September 8, 2005, page 4, lines 6-19, the Patent Office is obligated to provide actual evidence to support motivations to combine references. *In re Dembiczak*, 175 F.3d 994, 999 (Fed. Cir. 1999). *Dembiczak* explicitly requires that there must be evidence to support the suggestion to combine references. In the absence of actual evidence, the Federal Circuit fears that impermissible hindsight reconstruction might have been used to assemble the combination. To date, the Patent Office has not provided any evidence to support the combination of claims 2 and 3. Rather, the Patent Office argues that jitter buffers and history buffers are known. Whether such buffers are known or not begs the question whether there is evidence in the record that suggests combining known elements into the claimed invention. Merely because an element is known does not mean that there is a suggestion to combine references. MPEP § 2143.01. Since the Patent Office has not provided the requisite evidence, the combinations are improper. Since the combinations are improper, the rejections of claims 2 and 3 are improper. Since the rejections are improper, the claims are allowable.

Applicant requests that the panel of Examiners review the arguments previously presented and determine whether the Patent Office has established anticipation and a proper

motivation to combine the references. If the panel determines that these requirements have not been met, Applicant requests withdrawal of the rejections and claim allowance.

Respectfully submitted,

WITHROW & TERRANOVA, P.L.L.C.
